OURS

EDITORS

After the tiring congress in Amsterdam and a period of resting, here it is, the Newsbulletin of February. We hope you all received the Newsbulletin of January. More and more articles reach us and we are very happy to see this development. There is no satisfaction however, because we always want more News.

One remark on articles has to be made. I heard some people tell that the NB should have a coloured vision because of some articles. The only answer to that is that we put in all articles, without exception, that we receive. We are an independent AEGEE-news-organ, in which all AEGEE-members can put their articles. If one thinks it is one-sided there is only one solution: to react, pick up the penn and write an article !!
We will also be very pleased by some critical notes on the NB, in order to improve it.

Some very interesting months lie ahead of us. A lot of events will take place, all over our network. We published some programmes, in any case the ones that have been sent to the NB or to AEGEE-Amsterdam. If you want to publish your own programme, please send it to the editors. Everytime you have the chance to promote your projects, just take that chance !

Then we've got a new idea. It's however not our own idea, but the idea of Frank Geelen (AEGEE-Leiden). For all AEGEE-members it will be possible to receive the NB themselves. Of course every antenna will get it, but when individual members wish to receive it personally, we would like to offer this possibility. For the price of 5 ecu, to cover the costs of copying and postage, every AEGEE-er can receive the NB for one whole year. Application-forms will be spread during all kind of AEGEE-events.

We hope to see lots of you during the coming congresses. And do not forget the 3rd Anniversary of AEGEE-Amsterdam just after the EMS-congress of AEGEE-Rotterdam, it will be a fantastic happening again.

All organizing antennas lots of succes and strength, to have a very interesting and satisfying congress. AEGEE will shout all over Europe that together we will make it.

The editors.

AGAIN

PHILIPP

Think it again - AEGEE !

"Le but de l'association AEGEE-Europe est de promouvoir l'idée européenne au sein de la jeunesse, notamment grâce au monde étudiant."

Do we still share this ideal ?

Having a look on discussions in the AGORAS and other (sometimes secret) meetings you might get the impression that members do more appreciate exhaustively the balance of AEGEE-Europe than reflecting whether we should have antennae in non EEC - countries or other political questions. AEGEE has lost a lot of its originality by concentrating too much on practical matters and ignoring more and more the other part of our regional concept of "action-réflexion". Stressing this unity we should understand that AEGEE is more than a Young-European Managers Club neither is the Agora the General Assembly of the International Football Association. If we had concentrated on the unity of thinking and acting europeanly we wouldn't have so many problems in the fields of co-ordination and competence, transparency and understanding. Coming back to this ideal is our task for the coming months.

Think AEGEE !

ÆGEE - TALK

RALF

Some additional AEGEE-Talk which came in the day of the dead line: This is supposed to be a funny little advice how to handle the next AGORA.

AGORAPHOBIA: dictionary explanation: illness, opposite of claustrophobia, an abnormal dread of open spaces.

- Cure:
- 1) go to Salamanca
 - 2) stay calm
 - 3) listen to each other
 - 4) think before you speak
 - 5) don't stand up when you don't have anything to say
 - 6) argue, don't gossip
 - 7) don't worry, be happy

This AEGEE-Talk is coming from Ralf Teschner(AEGEE-München). The editors completely agree with this, especially cure 7 can be very effective. Let's all go as observers that can help a lot.

ÆGEE - TALK

EDITORS

A sad thing happened. Again no AEGEE-talk came in. Provocations proved not to work out, so we go on provoking you by publishing our own made-up talk. (Amsterdam chauvinism !!) Fortunately I went to the regional-meeting in Mons recently to pick up some gossip. Thanks a lot Christine and Christèle.

* Queensday: For the third time (3rd Anniversary !!!) AEGEE-Amsterdam organizes this party-weekend. For the first time another antenna (Rotterdam) organizes a congress just before the Queensday. So these participants will have the best chance (100%) to get lodging during the Amsterdam-celebration.

AEGEE-Amsterdam is a master in celebrating, as you all know, so do not hesitate and visit two famous and cute cities in one week. Find Gemütlichkeit et un weekend magnifique.

* NB-Fanclub: Already two members ! There will be lots of them soon. The motto is: think big ! And so the Newsbulletin will grow and grow and the editors will look like Rupert Murdoch (not financially alas !), a giant in Newsbulletins. Become a member of this fanclub and you will certainly not be disappointed

* Heard in Mons:

- Why is the AEGEE-Europe office in Amsterdam ?

Just because Daisy is living two minutes away, around the corner. So she, as a general secretary, does not have to go far to work.

- Christine has a problem. Perhaps we can help her.

How many kisses does one have to give as a greeting or good-bye during meetings and congresses. She can't remember it for every antenna and so there has to come a general European amount of kisses so that Christine knows what to do.

Christine in Amsterdam it will be three !!

(Suggestions can be sent to the NB)

- "It is impossible to have a 'bon coup' with blond guys !", this is what a naughty french girl said during dinner in Mons. 'Bon coup' is not easy to translate, so just ask a naughty french girl like Christèle.

All other gossip is a little personal, so we will not publish it.

If you have any gossip for the next NB, send it as soon as possible, the editors are very curious persons.

EXQUISE!

FINANCE ROTTERDAM

AEGEE-Rotterdam presents "European Finance". During the two-day congress on 27 and 28 of April at the Erasmus University of Rotterdam, the financial and monetary aspects of European integration will be discussed. As these subjects are not explicitly mentioned in the European White Paper, they are not directly related to Europe '92. The White Paper does not cover the liberalisation of the European capital flows and the future of the EMS (European Monetary System). Nevertheless, the European Commission considers it an important and final phase of the full realisation of Europe 1992. The timing of the congress has been chosen as to coincide with the publication of the report of the Comité Delors.

The congress will deal with a variety of aspects concerning the free flow of capital in EUROPE 1992 which will not be hindered by tradebarriers. The political aspects of the EMS, the advantages and disadvantages of a European central bank, changing patterns of investment decisions, etc. will all be covered by the congress. The congress will deal with matters both from a macro-economic and a micro-economic view.

First day.

During the first day, major European financial phenomena like the EMS, ECU and the issue of a central bank will be discussed. Various political standpoints concerning the future of a financially united Europe will be on the agenda. The first day will therefore bear a rather macro-economic character. The location for the first day will be provided for by our enterprising Erasmus University.

Second day.

The second day will involve a discussion of the consequences of the issues of the first day for European banks and insurance companies. Attention will be focused on the implications of a 'financially united Europe' for operational and strategic management. The location for the second day will be provided by the Rotterdam museum of art (resulting in an integration of Euro-finance and Euro-culture ?)

During these two days there will be plenty of time for relaxation. Part of the congress will be organized on water, as Rotterdam has the largest harbour in the world. Rotterdam has a clear business atmosphere and bustles with economic activity (and likewise, nightlife).

After this exciting congress, time is there to celebrate. AEGEE-Amsterdam, master in celebration offers you a party-weekend. AEGEE-Amsterdam celebrates her 3rd Anniversary and the Queen her birthday. The night of the 28th will be unforgettable: "The Orange-Ball". On Saturday the city is only celebrating; AEGEE-Amsterdam organizes in the evening hours a kind of a fantastic dinner. On Sunday there will be a Royal Brunch... and the end of some wonderful days. Details follow very soon. Inscriptions for Rotterdam and Amsterdam together go before the people only coming to the party. Go to Rotterdam first and feel the difference yourself. For more info call 31.20.5256924 and we will tell you almost everything.

AEGEE-AMSTERDAM

CLAIM LONDON

AEGEE-London congress: 'Human Rights in Europe'.

Dear Newsbulletin readers. This article is intended both to thank our recent visitors for their patience and good humour, and to act as a timely warning on behalf of ourselves and the long suffering accountants of AEGEE-Europe.

The financial position in AEGEE-Europe is such that antennas can no longer rely on the bank account, the Commission, God, fate or any other external or super-natural source to bail us out of financial difficulties. The view has been expressed to us, and we pass it on to you, that it is better not to have no congress at all than to allow standards to slip below three meals a day and a free lodging place. The 'Human Rights' congress was doggedly carried through, despite evident underfunding, on the opposite assumption, i.e. that a cancellation or postponement would cause more grief than accepting leaner hospitality. But the obvious way of avoiding such an unpleasant dilemma, which we wholeheartedly commend to you now, is to retain completely financial autonomy over 100% of your budget. If you assume that any money you need for a congress is money which you have to raise yourself, then ultimately you can never be disappointed.

And now for the good news !! A cash profit of £100 was cleared at the end of the conference party from entrance receipts, after the disco and room had been paid for. This money, as was explained at the time, is intended for the reimbursement of any accommodation costs incurred by visitors on the night of either Thursday 26, Friday 27 or Saturday 28 January. If you may have a claim, please write straight away (enclosing any receipt you may have) to: Bhagyesh Dash, 84 Northways College Crescent, London NW3 5DL. Allowing for Newsbulletin distribution time, all claims should be received by 15 June. The £100 will be shared out on that date and Eurocheques will be dispatched to claimants on the first available aircraft.

We began by saying, "thank you", to each and every one of the 103 AEGEEists who made the wet and windy journey across the water. We are glad you came. To those who had to suffer the rigours of Gulag on Judd Street, we can only apologise. This place, we are told, resembled a concentration camp - except that it was not as clean. One or two students found the hardship of substandard accommodation simply too much for them, and went straight home without attending the conference. Others were enjoying London, but did not attend the conference anyway. Others enjoyed London, enjoyed the conference and would have been financially embarrassed had the conference been postponed or cancelled. But to all those who expected more, and got less, we look forward to making it up to you next time.

Best wishes,
David Randal
Conference Organizer
&
Fritz Salchert
President AEGEE-London

TERRORISM

LEIDEN »

AEGEE-Leiden presents a congress on Terrorism:

"Towards a European response to terrorism: national experiences and lessons for the Europe of 1992." It will take place the 16th and 17th of March.

Why a congress on Terrorism ?

AEGEE-Leiden wants to explore the implications of Europe's internal borders in 1992 for the security of European citizens against the threat of terrorism.

The opening of the borders of Europe will open new opportunities to European and other terrorists, and it will also offer new challenges to those combatting terrorism and less serious forms of political violence.

At present there is a variety of approaches for dealing with terrorism, ranging from appeasement to proactive measures.

The organizers of AEGEE hold that it would be useful to inventorize the various national approaches towards terrorism within the EC as well as in some other nations.

We believe that it is mandatory for the near future to reflect about these issues now in public. Since this subject is so important nowadays, many speakers are willing to give their point of view.

They will reflect critically upon the anti-terrorist measures taken in their own country in the last two decades, and evaluate their merits in terms of effectiveness and acceptability to the ideas underlying Western civilization.

Finally the speakers are invited to suggest which national lessons there are to be learned for Europe.

To make our congress a real big succes, we would appreciate your visit to Leiden very much ! Enjoy two days of discussions about a to Europe's future highly important and actual topic: countering terrorism, to secure safety for all citizens. Attend your own country-study. It's worth it !!!

Lodging is no problem - comfortable student houses at the oldest university of Holland will be more than willing to receive foreign students.

Do not miss the opportunity to visit some of the typical Dutch pubs as well as our European Jazz-night.

Don't forget to register at your own antenna.

PROPOSAL

CARLO

AGHEE Euroculture

Object: Proposal for the organization of Workshops on connection with Summer Universities.

Euroculture agency's main purpose is the development of European ideals in a cultural point of view among AEGEE members. And also to try to make European students aware of cultural matters, to which too little attention has been paid.

But until now has never been the occasion to achieve a real contact between people interested in this matter. Obviously various high quality events have been organized about the matter, but actually they didn't completely gave to people the optimal chance to achieve a real confrontation.

As a matter of fact the structure of a congress (apart from the speakers level) doesn't give to people too much time for an active part, where they can react on what has been talked about.

The organization of Operating Workshops should obviate at these problems; giving people a possibility not just to listen at someone, but also to start an active work, where they will be followed by tutors, and have the opportunity to get a real confront with different approaching ways to the same matter, as different are our european cultures.

Organisation.

Every Operating Workshop should work on a determinate field, like photography, music groups, that can be developed in a practical way in order to fulfill a concrete people involvement, and also considering that usual AEGEE congresses already fulfill the theoretical aspect.

In order to get concrete results is absolutely necessary to look at the organisation of them not just as an holiday, but as a working event, that it's expected to be joined by people really interested in it: in fact the will not be too long for economical reasons, and will be really difficult to achieve even a minimal concrete results without a constant effort; besides the organisation of a workshop with tutors and small sub-events will be much more expensive than a summer university, and should be a pity not to get an effective and constant interest by workshop members.

Another aspect will be related on the workshop level: the main choice is between a low level for beginners, where the members are supposed to have just a minimal experience on the matter, considering it like hobby, and a high level for advanced students generally considering the matter as their future work, willing to confront their already consolidated experience with other people at the same level.

The first level will have a quite small budget, as will need not very highly qualified teachers, like people with a good experience on the matter as a hobby; but the second level will need university level teachers, or at least young professional for tutoring, with the necessity to integrate it with theoretical lessons or meetings with really qualified people, like university teachers: that means a really high budget.

Maybe the most practical solution is to leave the organisation task to antennas with operating summer universities, and to give them a similar organisation; but this will depend on the level achieved, as it is not so strategic to fix a relatively high fee for high levels, if people can get the opportunity of a good level experience.

PROPOSAL

CARLO

These are just basic ideas suggestion, and we hope to get more suggestions by everyone and every antenna that is interested in it.

SPONSORING

KARLSRUHE

Some time ago AEGEE decided to face the problem of unco-ordinated contacting of big companies (remember Siemens ?!) by creating a European sponsoring group which could keep up th contacts to the 'big ones'. up to now this team does not exist but a first step shall be made hereby:

Concerning the following companies there mustn't be any more unco-ordinated contacting from now on:

Arburg (Lossburg), Apple (München), BASF (Ludwigshafen), Bertelsmann (Rheda), Burda (Offenburg), Coca Cola (Essen), Commodore (Frankfurt), 3M (Neuss), ESSO (Hamburg), Hamburg-Mannheimer (Hamburg), Heine (Karlsruhe), Hewlett-Packard (Böblingen), IBM (Stuttgart), Karstadt (Essen), Michelin (Karlsruhe), Nestlé (Vevey), Nixdorf (Paderborn), Procter & Gamble (Schwalbach), Unilever (Hamburg), Vorwerk (Hameln), Wang (Frankfurt).

In accordance with Volker Haber, CD-member in charge of sponsoring, contacts to these companies only may be set up by sending me

* information about your project you want to get support for and

* a detailed letter on what kind of support you'd like to get from the company you are referring to.

I will send this material to our contact person in the company and will join you when there will be a meeting (you should send information about your activities even if you do not want to get support. that will enable us to prove that AEGEE is an active association- up to now it has been a big mistake not to do so).

Furthermore I will keep up the contacts until another AEGEE member will have taken over the job.

This procedure shall not and does not touch the power or the possibilities of any antenna but enables us to get better relations with big companies.

One last important thing !!! to do this job properly, I need all information about those companies and all the letters that have been written to or by them.

I hope many will cooperate and even start own initiatives concerning sponsoring.

Yours

Michael

(Michael Stuber, Essenweinstr. 28, D-7500 Karlsruhe 1, 49.721.691126)

Regional meeting South-East.

Hallo south-east.

Following the invitation most of you already received I would like to announce the 2nd regional meeting of the south-east which will be held in REUTLINGEN (southern Germany, near Stuttgart), April 8-9. The main tasks of the regional meeting are the exchanges of experience and information. Therefore we will have the following agenda:

1. Presentation of the Antennae projects (european and local)
2. Workshops as
 - finance and accounting (all treasurers & Dorothea Heister)
 - internal organisation of an antenna
 - antenna PR (Jeanette Rutteman)
 - How to build up an antenna ?
3. Election of the regional responsible. (cf. Orléans N. 176)

Bring examples of your sponsoring-letters, congress-brochures, articles in the local newspapers etc.etc. to inform the new contact-antennae how work can be organized within an Antenna.

Some new addresses in the south-east (contact-antennae):

Sponsoring/Co-ordination

Dear Presidents, dear Sponsoring-responsables,

Talking to companies about AEGEE: what a big mess! 20 letters of several antennae (and even two of the same antenna at the same moment) to IBM-Deutschland - they wonder about our co-ordination. AEGEE does not give a very good picture to all these potential sponsors for the future? (remember Siemens....)

What should be done? Co-ordination = exchanging information about: Who had a contact to which company? Which companies are you trying to contact now and which would you like to contact later?

Exchanging all these information and co-ordinating sponsoring should be done by the European sponsoring co-ordination working group (impressive, isn't it?), involving people both from the antennae and AEGEE-Europe.

My proposal: Having been approached by some antennae I would like to meet for the first time in Lyon where we should discuss the general lines of the co-ordination task. On Sunday there will be held a sponsoring working group and where some of you could be present I hope.

2nd step: Preparing ourselves in the weeks after the PC for the first meeting of European Sponsoring WG in Reutlingen April 8/9. There we should arrange sponsoring matters in fixing which antenna will be the partner of which company representing the whole AEGEE-network. This is a big opportunity for antennae-members to be directly involved on the European level - learning more about european work and thinking. Waiting on your comments. Call me !!

VOLKER

To all AEGEE-antennas:

1. I should like to remind all AEGEE-antennae that, in view of the number of excellent contacts the CD has with different national government ministries ALL contact with the Federal Govt. of Germany should be made through me. This includes requests for subventions speakers, meetings and any other more general requests. It is absolutely essential that this rule is adhered to because the ministries need to retain one central point of contact. Requests which are sent directly to the ministries by individual antennas will have a detrimental effect for AEGEE and reduce our chance of obtaining further help in the future. All meetings at the ministries will be arranged by one and attended by a member from the antenna will be permitted to go the ministries alone because of the importance of these contacts for the network as a whole.

2. We have recently received a letter from Mr. Richard von Weizäcker, president of the FRG reminding us that he only agreed to be a patron of EGEE II in Munich; and that he never agreed to become a general patron of the association. In the future NO antenna must use the name of von Weizäcker in its list of general patrons in conference brochures or on the head of their notepaper. It is clear that if we use his name any more, this will result in serious problems for the network.

3. Finally I am the person in the CD responsible for the juridical commission. This means that any questions about the statutes, working format of the association (règlement interieur) and other quasi-legal problems should be directed to me in the first instance.

Yours Volker.
